## **Delivering End-to-End Technology Solutions with Core Link Arabia.**

Core Link Arabia delivers integrated ICT, security, and smart building solutions that keep your business connected, safe, and efficient.

# About **Core Link Arabia**

At Core Link Arabia, we offer comprehensive ICT, networking, and security services under one roof. Established in 2025, our integrated approach ensures every project—from planning and design to implementation—meets modern business needs and operational goals. We manage the full lifecycle of mission-critical systems, ensuring high availability, minimal downtime, and regulatory compliance for every project we deliver.

A background of a network diagram with light blue lines connecting various nodes, some of which are highlighted with small blue circles.

## Our **Vision**

To become a leading system integrator in the Middle East, delivering innovative and secure technology solutions.

## Our **Mission**

Empowering organizations with reliable IT infrastructure and intelligent systems that drive growth.

# WHAT WE DO

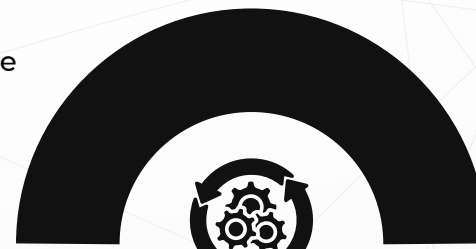

## Design & Strategy

Crafting tailored ICT and security architectures that align with specific business goals.

## Seamless Integration

Bringing diverse systems into one unified, functional ecosystem.

## Operational Continuity

Ensuring 24/7 reliability through proactive maintenance and SLAs.

## Compliance & standards

Aligning every solution with international technical standards and local regulatory requirements.

# Service Portfolio

## Data Center Solutions

Design, deployment, and operation of reliable IT and data center environments supporting mission-critical business systems.

## Physical Security Solutions

Integrated physical and digital security services ensuring protection, visibility, and operational control.

## Low Current / Smart Building Systems

Intelligent building and low-current systems delivering automation, efficiency, and centralized management.

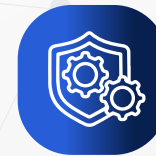

## Audio Visual (AV) and Smart Conference Systems

Integrated audio-visual and smart meeting room solutions for effective communication and collaboration.

## Cybersecurity Services

Protect your digital environment and ensure secure operation.

## Operations, Maintenance & SLA Services

Operational services ensuring long-term system performance, reliability, and compliance.

# Detailed Service Sections

## Data Center Solutions

Reliable IT and data center environments are essential for supporting mission-critical business systems. This vertical covers the design, deployment, and operation of high-performance infrastructures.

- Data Center Design & Build.
- Structured Cabling Systems.
- Power & Cooling Systems.
- Server & Storage Solutions.
- Core Network Infrastructure.
- Environmental Monitoring.
- Centralized Operations Dashboards.

## Physical Security Solutions

Integrated physical and digital security services ensure maximum protection, visibility, and operational control for any facility. The solutions provide a multi-layered defense strategy.

- CCTV & Video Surveillance.
- Smart Access Controls.
- Perimeter Security Systems.
- Intrusion Detection Systems.
- Fire Safety Systems.

## Low Current / Smart Building Systems

Intelligent building and low-current systems deliver automation, energy efficiency, and centralized management. These solutions transform infrastructure into smart, responsive environments.

- Building Management Systems (BMS).
- Guest Room & Hospitality Systems.
- Energy & Environment Monitoring.
- Lighting & HVAC Control.
- Occupancy & Environment Sensors.
- Parking & Access Systems.
- Public Address & Intercom Systems.
- Central Monitoring Platforms.

# Audio Visual (AV) and Smart Conference Systems

Effective communication and collaboration are facilitated through integrated audio-visual and smart meeting room solutions, creating seamless interactive experiences.

- Smart Conference & Meeting Room Systems.
- Audio & Video Systems.
- Video Walls & Large Displays.
- Digital Signage Solutions.
- Control & Automation Panels.
- System Integration & Commissioning.

## Cybersecurity Services

Digital environments are protected through specialized services that ensure secure operation and data integrity. The focus is on proactive defense, risk mitigation, and compliance.

- Risk & Compliance Services.
- Threat Protection & Response.
- Secure Network Design.

## Operations, Maintenance & SLA Services

Operational services ensure long-term system performance, reliability, and compliance through dedicated management programs. We act as your long-term partner to ensure minimal downtime.

- Service Level Agreements (SLA).
- Operations & Maintenance (O&M).
- Preventive Maintenance Programs.
- System Health Monitoring.
- Incident Response Support.
- Technical Training & Handover.

Why

# Core Link Arabia

Single-source delivery for all ICT &  
Security needs.

Focus on reliability and uptime.

Vendor-agnostic system  
integration.

Experienced technical and  
operational teams.

Long-term partnership mindset.

Structured SLA-driven service  
model.

# Our Partners & Clients

Core Link Arabia collaborates with leading global technology vendors, enabling the delivery of reliable, scalable, and future-ready solutions. Through strong professional relationships and a deep understanding of enterprise and government environments, we engage with clients using a consultative, solution-driven approach. Our focus is on aligning proven technologies with real operational needs, ensuring clarity, confidence, and long-term value in every engagement.
